**Notes:**

0/ All panels 18mm, high quality multi-ply recommended

1/ brace shape is only suggestive -- prime purpose is to brace driver, it needs to be about 35-40% holes. (ie if you have to mount a terminal cup in the middle, you'll want to make sure the brace allows clearance), It is intentionally just off centre.

2/ Don't forget to angle cut the back of the driver cut-out to give it breathing room

3/ Line the box all faces 1in acoustic fibreglass, Ultratouch or similar. Additional well teased poly-fluff can be added as volume fill if there is too much bass
